

We're a professional consulting firm specializing in forest and environmental management, geomatics, digital analysis of the natural environment, and the development of custom tools and processes using geographic information systems.

We're friendly, down-to-earth people who are passionate about promoting healthy forest ecosystems, sustainability, and environmental stewardship. We work hard to provide excellent service to our clients, and collaboration and open dialogue helps us do just that.

At the end of the day, our work speaks for itself! It's more than just completing projects on-time and on-budget; it's about collaborating with clients, partners and friends, and working together with people in the communities that support our operations.
